Women Friendly Multipurpose Integrated Vertical Nutri-Farming System (IVNFS) for Vegetable production with Mushroom & Poultry	ICAR-CIWA	<p>Women Friendly Multipurpose Integrated Vertical Nutri-Farming System (IVNFS) for vegetable production with mushroom and poultry" a cost-effective durable structure, contributes to dietary diversity and household nutritional security to the landless farm families. This IVNFS system could be established in the limited area (12.72 m²) of backyard and diverse produces could be harvested from small area. The area for vegetable cultivation and mushroom/poultry farming is 12.81 and 8.45 m² respectively. Farmwomen could take care domestic duties and grow vegetables with mushroom or vegetables with poultry simultaneously. The trough height was designed to reduce drudgery during intercultural and harvesting operations and ensure household nutrition and</p>	 <div style="border: 1px solid black; padding: 5px; width: fit-content; margin-left: auto; margin-right: 0;"> IVNFS for vegetables + mushroom </div>

		<p>supplementary income. It increases farm women's resilience to climate vulnerability and offer subsidiary source of income.</p> <ul style="list-style-type: none"> • The IVNFS for vegetables + mushroom can produce about 80 kg vegetables and 50 kg mushroom in one year. • The IVNFS for vegetables + poultry can produce around 80 kg vegetables, 2016 nos. eggs, 35 kg meat and 125 kg manure in one year. 	 <div data-bbox="1426 627 1875 659" style="border: 1px solid black; padding: 5px; text-align: center;"> IVNFS for vegetables + poultry </div>
