Title	Brief description	Photographs
Gender Sensitive Model for Doubling Farmers' Income (DFI)	<p>In the model, the gender perspectives were integrated by way of assessment of gender concerns in accessing productive resources and extension services among the farm families, counselling and gender sensitization of the community, and promoting community organizations (knowledge groups of women). Demonstrated the need-based modules through training, demonstrations, capacity building programmes, input support and advisory services, promoting high yielding varieties and hybrids. Modules were allotted to different farm families as per their resources and interests. It could be inferred that the technological interventions could result in the enhancement of annual farm income by 69% over control and cash in hand among farmwomen (mean annual savings 133% enhancement) for a farm family with 1 acre of land holding with multiple resources of agriculture and allied sectors.</p>
