Comb Stripper for groundnuts	AICRP on Women in Agriculture, Centre: MPUAT, Udaipur	<p>This tool is made up of iron sheet designed in comb type structure. It has weight of just 200g. It is handy, portable, comfortable and convenient to use. It has efficiency of 6-8 kg per hour as against 2-3 kg/h of traditional practice. It is very useful at the end of kharif season, because the dried groundnut plants are ready for stripping off groundnut pods from the cut plants. The teeth of this comb catch the pods and stripped off from plants root.</p>
